

LABORATOIRE du PEPTIDE™ SERIES

MAIN ACTIVE INGREDIENTS

“BOTOX-LIKE” PEPTIDES

Unique anti-wrinkle peptides. Inhibit the neuromuscular junction to relax the muscles. Effectively **reduce „crow's feet”, wrinkles around eyes and mimic wrinkles**. Allow wrinkles prevention and give a „botox-like” effect in non-invasive way.

NEUROPEPTIDES

Hamper the transmission of signals from the nerve fibres to the mimetic muscles. Relax muscles responsible for the formation of facial wrinkles and **reduce the depth of wrinkles**. The visibility of wrinkles is minimized (e.g. **around the eyes, mouth and the forehead**).

WHITENING PEPTIDES

Guarantee safe whitening through the reduction of melanin synthesis, inhibit melanogenesis. **Minimize discolorations and age spots**. Lighten the skin, inhibit the formation of pigmented lesions and **align the skin tone**.

SIGNAL PEPTIDES

Provide “**collagen boost**” effect. Initiate the growth of fibroblasts, which are responsible for the production of elastin and collagen in the skin. Regulate fibrillogenesis. **Stimulate the synthesis of collagen** (types I, III, IV), protect collagen from degradation and **improve skin firmness and elasticity**.

VITAMIN E

A **powerful antioxidant**. Protects epidermal lipids and collagen fibres from free radical damage. Improves **skin tension and reduces visible wrinkles**.

LABORATOIRE

du peptide™

INNOVATION PERFORMANCE SAFETY

LABORATOIRE du PEPTIDE™ SERIES

Laboratoire du peptide™ series slows down the changes in the skin during the aging process thanks to containing strong anti-aging ingredients, such as: “**botox-like**” peptides, “**collagen boost**” signal peptides, **neuropeptides**, **whitening** peptides.

Due to this, we observe the following results:

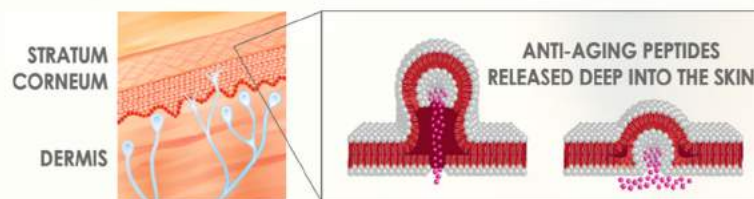

- ✿ the visibility of all types of wrinkles, “crow’s feet” and fine lines is minimized,
- ✿ the formation of new lines and wrinkles is delayed,
- ✿ the skin is more firm, elastic and smooth due to increasing collagen production,
- ✿ effects: “**botox-like**” and “**collagen boost**” in non-invasive way.

**ANTI-AGING FACE SERUM,
ANTI-AGING EYE SERUM,
ANTI-AGING NIGHT CREAM,
MOISTURIZING MICELLAR CLEANSER**

LABORATOIRE du PEPTIDE™ SERIES

EFFECTIVE TRANSDERMAL DELIVERY SYSTEM

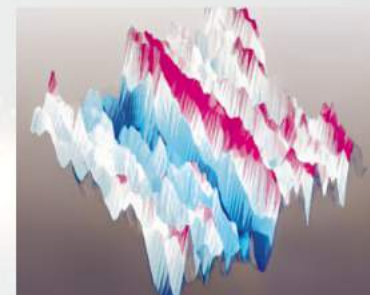

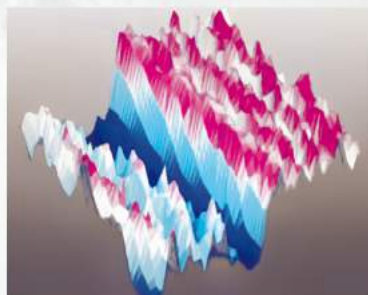

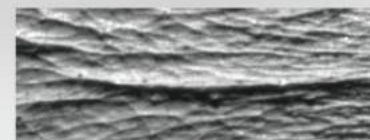

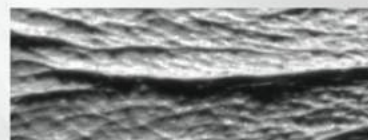

Liposomes are efficient penetration enhancers and **provide effective performance** of anti-aging Laboratoire du peptide™ series.

CLINICAL EVALUATION OF EFFICACY

**Laboratoire du peptide™ eye serum
minimizes wrinkles just after 6 weeks of regular use.**

BEFORE

AFTER

Instrumental test was performed on the skin of 40-60 year women (the darkest blue colour shows the deepest of wrinkles)
