

LUTRONIC
Intelligent Care™

CLARITY II™

with IntelliTrak™ technology

- Higher power 755/1064nm platform for effective treatments up to 45%* faster
- Brilliantly removes hair, pigment, and vascular lesions in all skin types
- IntelliTrak™ technology and Temperature Sensing enable increased provider confidence and treatment efficacy

Clarity II system is CE Marked and has US FDA clearance; some features may not be available in the US.

Intelligently Designed for Faster, Improved Outcomes

Lutronic's Clarity II™ is a high-powered, dual-wavelength platform that effectively delivers a wider range of parameters to help safely and efficiently treat the broadest indications with ease. The innovative design includes: a single fiber for all spot sizes (2-25mm), intuitive interface, and no need for calibration after any parameter change. Clarity II can save time and help facilitate faster, more effective treatments.

Revolutionary IntelliTrak™ technology & Temperature Sensing

Only Clarity II provides these two new clinically valuable capabilities to help practitioners deliver efficacious treatment coverage. The proprietary IntelliTrak technology ensures consistent rapid energy delivery at the density you select regardless of how fast you glide over the skin. Temperature Sensing provides real-time feedback to help inform treatment efficacy and safe endpoints. The innovative Clarity II platform is another example of Lutronic's intelligent design for Intelligent Care™.

Confidently Provide Better Efficacy & Rapid Results Your Patients Demand

FULL RANGE OF APPLICATIONS

- Hair removal
- Pigmented lesions
- Wrinkle Reduction
- Rosacea
- Hemangiomas
- Leg veins
- Café au lait
- And more...

INNOVATIVE

IntelliTrak technology and Temperature Sensing for most efficacious coverage

INTUITIVE

Advanced ergonomic handpiece with multi-spot, quick-zoom cartridges, and large touch screen GUI

DEPENDABLE

Built upon the foundation of Clarity's worldwide performance

EFFECTIVE

Higher power and rep rates for faster treatments and patient results

IntelliTrak™ technology and Temperature Sensing

"From my vast experience with 755/1064nm long pulse platforms, I find that the Clarity II provides truly meaningful advantages over other devices. Its higher energy and wider range of pulse widths allow me and my delegated staff to effectively treat every indication in my practice with more speed and confidence than ever before. The intelligent capabilities, large spots, and faster rep rates help us achieve satisfying patient results after fewer treatments."

David J. Friedman, MD

*Compared coverage speed at same parameters: 755nm, 3ms, 16J/cm2. With larger spot and higher rep rates, Clarity II is 45% faster than GMP (9.12 cm2/sec versus 6.28 cm2/sec).
